Hi Stephanie,

This is awesome! Thank you so much.

Thanks!
Randi

Hi Randi!

I have been underwater at this research methods workshop! So much coming at me that I'm fried at the end of the night. So, this testimonial might be coherent or not, but I'm willing to edit either way!

Testimonial: Dr. Sim's knowledge in qualitative methods has been critical for my research project. Not only has she provided quality analyses, but her ability to explain the proper methods has benefited my research greatly.

- Permission to link your project's public abstract through NSF to the website
- Permission to write a short summary of your project and statement that QED/I consulted on your project

You have my permission for both!

Let me know if you need anything else!
Stephanie

Subject: Website Testimonial

****External Sender****

Hi Stephanie,

Would you mind writing a testimonial about my QED's work for the new QED website?

Specifically, I'm asking for:

- A short (1-2 sentence) testimonial about my/QED's work on your project
- Permission to link your project's public abstract through NSF to the website
- Permission to write a short summary of your project and statement that QED/I consulted on your project

Please feel free to decline for any reason. Not everyone is comfortable sharing their thoughts or their project's information on the internet, there is no pressure to agree 😊.

Thank you!

Randi
